	Classification	0.00%	0.00%	75.00%	6.25%	18.75%	0.00%	0.00%	0.00%

What did you like best about the course and/or how the instructor taught it?:

Seq	Answer
1	Video lectures if you miss class, the tests are set up good, the projects are well written
2	In general, Lui was a relaxed dude that was more than willing to explain topics in as many ways needed to make sure every student understands the material. That said, both the instructor and the course were taught very well.
3	I really appreciated the time Dr. Liu answered our questions in class. I also appreciated how quickly things were graded.
5	Tackling problems and breaking them down to understand each step clearly.
7	Doctor Liu is a very well organized instructor. He takes full responsibility on his lectures and he is always prepared. He is one of the best teachers that I have had so far. Keep up with the great work Doctor Liu.
9	Clear road map on what and how we were going to learn certain concepts.
11	The format and structure
12	I like that we did not fall behind. The lecture videos were super helpful for studying.
13	I was very satisfied with how my professor graded our projects and tests. He made the class passable if you put the work in. I wish the school of computing had more professors like him.
14	Powerpoints and lectures were available online for review.
16	He was incredibly thorough when explaining the information and always made sure everyone understood a concept before moving on.

What suggestions do you have for improving the course and/or how the instructor taught it?:

Seq	Answer
1	Solving actual problems with the homework would be cool. Doing the same kind of assignment in different ways was helpful but monotonous.
2	Can't think of anything that should be changed. Even the projects, though similar, were all different enough that I was able to become far more proficient with java and it's inner workings than I was before.
5	Have more student demonstration examples in class.

9	None
11	keep up the video uploads of the lectures
12	Keep up what you're doing!
13	This course is already fantastic. I can't imagine what could make it better.
