	Classification	0.00%	7.69%	84.62%	0.00%	7.69%	0.00%	0.00%	0.00%

What did you like best about the course and/or how the instructor taught it?:

Seq	Answer
3	The instructor was able to convey very abstract things like how a linked list works or traversing binary search trees in a way that I understood it the first way around. It was better than just reading the book.
6	projects were challenging but could be applied to a professional setting easily.
7	Excellent teacher! I hated my first experiences in programming due to my unmotivated monotone professors in CS1 & 2. His instructions actually made me think data structures was easier than CS1 & 2.
9	Good feedback, grades come back the next day most of the time.
10	The course progressed at a manageable pace, and the textbook was easy to understand. The instructor did a great job covering the material in a logical order, and providing assistance as needed.
11	Hard class but great professor
12	The progression was smooth and logical in terms of complexity and how concepts built off of each other.
13	I liked that the instructor provided many examples on the material we learned. He was able to answer any of our questions and explained everything in a clear way.

What suggestions do you have for improving the course and/or how the instructor taught it?:

Seq	Answer
2	He needs to learn how to assist the students on an individual basis. He rarely attempts or does not do this at all.
3	Not having the course so early in the morning.
7	Class can be very slow at times. Don't like the grading weight of questions such as a single multiple choice question being as important as a short answer.
9	He carries on for long periods of times on the same subject. The pace of the class is too slow, this could be a summer B course and we'd still have time to spare. Much of this course was just refresher from previous courses, nothing new... really boring.
11	Having more projects would help or having some 'homework' assignments, but overall this was a great class
13	Keep up the great work! No suggestions from me.
